Personalized heart failure care: Integrating device therapy across the ejection fraction spectrum

Industry innovation event at HFSA†

Date	Time
Sunday, September 29	5:30 p.m. - 6:30 p.m.

Location
Signia by Hilton Hotel | Triumph Ballroom B
159 Northside Drive NW, Atlanta, Georgia 30313 U.S.

Featuring
Biykem Bozkurt, MD | Houston, TX, USA - Moderator
Andrea M. Russo, MD | Camden, NJ, USA - Moderator
Harriette G. C. Van Spall, MD | Hamilton, Ontario, Canada
Prof. Klaus Witte, MD | Leeds, UK

Register to attend

Audience
Electrophysiologists and heart failure specialists.

Add to calendar

Overview

This case-based interactive session aims to emphasize the need to integrate cardiac implantable electronic device therapy into personalized, comprehensive heart failure care across the ejection fraction spectrum. The first case discussion will focus on sudden cardiac death prevention in patients with HFrEF, highlighting the complementary roles of HF medications and ICD therapy. The second case discussion will address common misconceptions about heart rate lowering in patients with HFpEF and review current evidence on the safety and benefits of personalized accelerated pacing in this patient population.

† This Industry Innovation Event is not part of the scientific program as planned by the HFSA Program Committee. This event is neither sponsored by nor endorsed by HFSA.

This event does not qualify for continuing education credit.
